BY BETTY PETRUK

INTERNATIONAL MONETARY FUND

JULY 22, 1944

12:00 PM

CONCORD, NEW HAMPSHIRE

The International Monetary Fund was established following WWII to help the World economy rebuild itself. It is governed by its membership and accountable to each countries Government with over 184 countries enrolled. It was originally established with 45 countries that wanted an accountable structure set in place for Global Finances that would alleviate the possibility of another Great Depression of the 1930s.

The mandate set forward was:

1. Promote Global growth and economic stability.
2. Prevent economic crises
3. Resolve crises when they occur.
4. Alleviate poverty.

To meet the mandate objectives, the IMF uses three main functions:

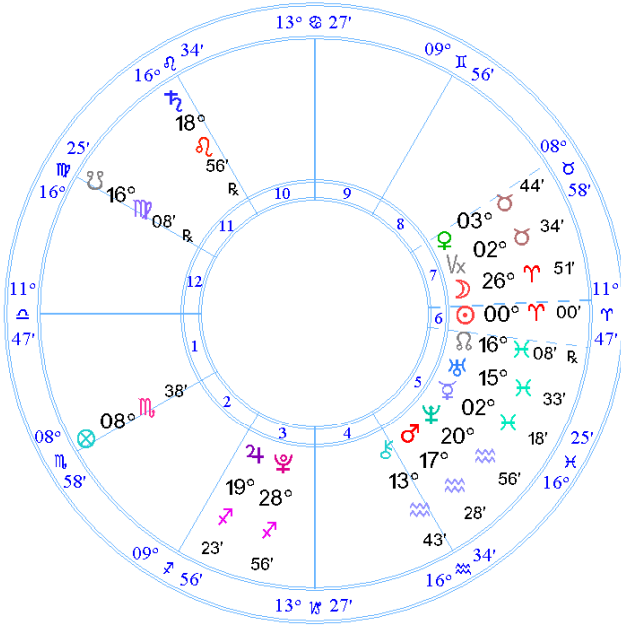

1. Surveillance
2. Technical assistance
3. Lending

The IMF resources are provided by the member countries, by payment of quotas based on each countries economic size. They are payable upon joining the IMF. The quotas are the maximum financial commitment by each member and determine the voting power and financial assistance that each member receives. The unit of account by the IMF is denominated in Special Drawing Rights (SDR's).

The World is getting smaller and smaller and the top financial Giants are the one's who seem to have the control. The top 5 with 38.51% of the voting power are as follows:

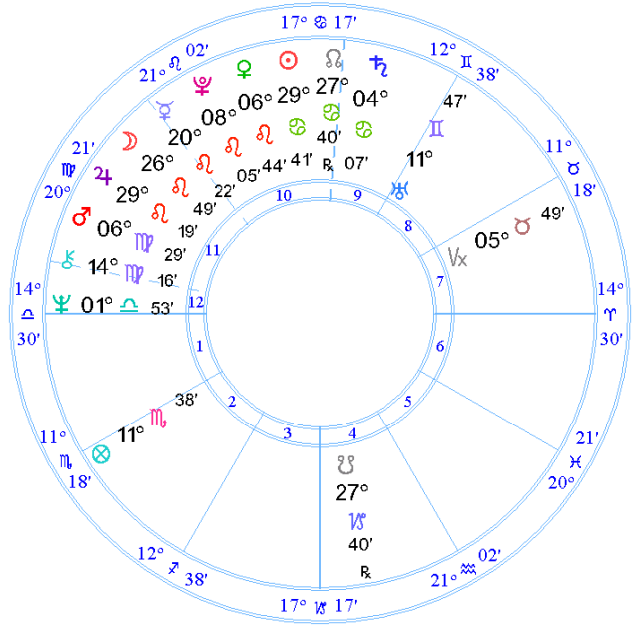

1. United States - 371,743 votes (16.83%)
2. Japan – 133,378 votes (6.04%)
3. Germany – 130,332 (5.90%)
4. France – 107,635 (4.87%)
5. United Kingdom – 107,635 (4.87%)

Interesting line-up, these were the top players in the last WWII, once enemies, and now supporters. So does the term New World Order mean anything here? I think so. What is up for this year with the IMF and consequently with the Top 5 Nations. The Aries Ingress is set for Washington, DC as that is the place of power and the headquarters of the IMF and UN; it may shine some light on the matter. The charts below have been taken from Kepler and some of the data from Marjorie Orr's book "The Astrological History of the World" The information about the IMF was interpreted from their web site: www.imf.org.

The IMF chart has the Sun at 29 degrees Cancer in the 10th; disposed by the Moon at 26 degrees Leo in the 11th. When the IMF was started there was a great need for restructuring the War torn countries. The resources, monetary, were also scarce. The 29 degree Sun supports the statement of the founding of the IMF, to rebuild homelands of the World. The Moon at 26 degrees Leo in the 11th house in semi-sextile to the Sun, shows the need for Group leadership. The Sun and the Moon are in mutual reception. Everything in the chart is disposed by the Sun/Moon mutual reception. For this project to work there had to be a mutual sharing of Leadership and responsibility. Venus rules the Ascendant conferring the need to balance the leadership of this endeavor. Venus is at 6 degrees of Leo conjunct Pluto at 8 degrees of Leo in the 10th. Pluto rules the second house of the owned assets and wealth of the project. The MC is at 17 degrees Cancer ruled by the Moon in mutual reception to the Sun. Saturn in the 9th of Laws and foreign people rules the 4th of the end of the matter and shows the need for new Laws and treaties to preserve the cultures of the world. Mars in Virgo in the 11th rules the 7th of partnerships. The service of this project is to be driven by planned, reviewable procedures that all partners are subject to. Uranus in Gemini in the 8th rules the 5th of money speculation. Neptune in Libra in the 12th shows the ideal of equal partnership to help the underprivileged.

It is interesting to note that the first meeting that originated the IMF came from a meeting of the World Bank in July 1944. The UN was not founded as of yet, and the war was still going on.

Wars bring profit and expansion to some countries and devastation and chaos to others. The US did not enter the war until Japan bombed Pearl Harbor. The United Kingdom and France were holding out at all costs; the French had to maneuver in the under-ground.

The World Bank was established on July 1, 1944 and at that meeting, the IMF was also established. The World Bank presidents have all been Americans and appointed by the US government.

The Aries Ingress Chart shows the Sun in the 6th of the work force, military, unions and police. Leo is on the 11th house with Saturn in Leo in the 11th. There has been a push from the US government to get the Star Wars missile defense system into Europe with Poland being one of the countries being approached. With the threat of Iran going Nuclear, the US is looking to protect its land by having a first strike missile defense system in Europe to intercept any missiles aimed at the US. The United Kingdom is interested, but has been passed on this issue. France has been quiet on this issue. Germany was angry that the Russians were not consulted on the proposal to Poland. Japan has a missile defense system in the works with the US after a missile flew over Japan from North Korea. The project is due for completion in 2011.

The Moon at 26 degrees Aries is at a critical degree, rules the 10th also at a critical degree. The Sun and Moon are disposed by Mars in Aquarius in the 5th, rules the 7th. Could there be a change of policy among the membership?

The intension of the organizations developed during WWII seemed to be for the betterment of all, but a partnership that is not equal is not a partnership. Disputes, resentments, and hostilities have been the historical outcome of these types of partnerships. Maybe one day, the building of the World to be equal will start to surface when Pluto, the non-entity, trucks its way through Capricorn, and that will be an interesting time to follow the money.
