Everyone enters this Evolutionary Life Cycle when they come onto the Earth plane. It is comprised of 3 ongoing cycles, each progressing onward: The first is Physical, second is Mental, third is Spiritual. We will travel through the 12 houses of the Zodiac with our Planetary Guide for each. A summary at completion of each 7 year segment will assess where we should be if we are on track and possible outcomes if all does not go well. ## Astro Forecast: **"Gemini"** Written by **Inge Lohse**

**May 21 to June 20**

**A mutable air sign of positive polarity ruled by Mercury. Key Phrase: 'I think'**

Gemini is represented by the twins, Castor and Pollux. Gemini rules the nervous system, hands, shoulders, arms and lungs. In Gemini, the sun is versatile and flexible. Gemini people are sociable, curious and inquisitive. Variety is a must in their daily routine. This air sign is thirsty for knowledge and eager to study and usually have a highly developed learning capacity. Their inventive imagination makes them great writers. The dual nature of Gemini sometimes makes you think there really are two of them talking to you at the same time. This is the only sign of the zodiac that can lay legal claim to an alter ego. It's really OK if you talk to and answer yourself. The rest of us have to cop a plea of insanity.

**Forecast 2008 to 2009**

Powerful Pluto is finally moving on and will no longer oppose your Gemini Sun. As Pluto transits the sign of Capricorn he will quincunx your sun. You will need to make a lot of adjustments during the next 16 years. This is not an easy flow of energy, it is a period of annoyances and problems for you to solve.

Nebulous Neptune from sign of Aquarius is trining your Gemini planets. This is creating new dimensions for your active imagination to explore. Your perception is very acute and will inspire you to be sensitive to the needs of others. Your own ego is secure in the knowledge that you are able to lend a helping hand to those that need it most.

Unique Uranus from the sign of Pisces is challenging (square) your Gemini Sun. So, now, you can say with certainty, you really did not understand. This gives a Gemini so many new ways to tell the story.

Serious Saturn moved into the sign of Virgo in September 2007. This sets up an obstacle course for you to maneuver through. Saturn is about structure and Virgo keeps things organized. Gemini needs to have a variety of choices. For the next couple of years you may find yourself bound by responsibilities that hinder your natural instinct to be flexible and spontaneous.

Jupiter, the seeker of truth, moved into the sign of Capricorn in December 2007. Jupiter, the planet of freedom, is in the sign of Capricorn which sets parameters and likes borders. This is another quincunx aspect to the Gemini Sun. The year will bring many situations which will require that you be flexible and willing to alter your plans. Gemini is very open minded, and that is to your advantage - having the wisdom to willingly adjust to the circumstances when necessary.

Summary: Gemini's have a mixed bag this year. Both Pluto and Jupiter in Capricorn require that you adjust to circumstances beyond your control. Neptune is fueling your imagination, while erratic Uranus is arguing with one of you. Saturn is limiting your choices. It's a bumpy ride for Gemini's this year. Might I suggest an extra thick pillow to sit on - or just do what you do best: go with the flow, and enjoy the ride - as it's bound to be exciting year.
