F.Y.I. : The Astrology of the Iceland Volcano

Written by Lynn

Scooped from the net www.blog.beliefnet.com/astrologicalmusings2010/04/the-astrology-of-the-iceland-v.html

Beginning late in December, with Saturn and Pluto aligned in a tight challenging square formation, seismic activity began to activate the Eyjafjallosjokull volcano area. The challenging square formation creates a build up of energy that necessitates a release, often an explosion or crisis of some kind. Obviously, the Saturn/Pluto square has not caused volcanic eruptions everywhere, but this is an interesting coincidence.

Pluto is the god of destruction and regeneration, and as it travels through the earthy sign of Capricorn I have long predicted an upsurge in volcanic and earthquake activity along with other earth changes, particularly next year when Uranus and Pluto begin to square off in a challenging battle.

This seismic activity gave rise to a number of small earthquakes beneath the volcano, and by late February GPS readings showed the earth had begun to quickly displace. Between the 3rd and the 5th of March, close to 3,000 earthquakes were measured at the epicenter of the volcano. (source: Wikipedia).

The current volcanic eruption is thought to have begun around 11 pm local time on March 20. At the time the Sun had just entered Aries and was opposed by Saturn, setting off the Saturn/Pluto square. At the time of the eruption, Neptune was sitting right on the IC of the chart for the local area, suggesting the presence of the water element and the presence of fog or mist.

Shortly after this initial eruption, a flow meter device recorded a sudden and unprecedented rise in water level and water temperature.

On April 14th, at the time of the New Moon in the early degrees of Aries (fire and initiation), the volcano resumed its eruptions, causing flooding and the release of a large cloud of volcanic ash that closed the airspace in Iceland and Norway. By April 15th most of the United Kingdom was also closed to air travel, and the large cloud of volcanic ash quickly spread to other parts of Europe.

A look at the geodetic's of the situation provides a clue to the location of this event. > **pg.3**

Iceland Eruption Con't

Geodetic astrology is the fascinating application of astrology to the geodetic map, beginning with the zero degree Aries point at the Greenwich meridian. Using this system, the Midheaven line of Reykjavic in Iceland is located at about 9 degrees of Aries, in a close aspect to both the Saturn/Pluto square and the Aries New Moon.

The other area of the world closely affected by these planetary alignments is Los Angeles and San Diego, with the Midheaven in the early degrees of Capricorn and the Ascendant in the early degrees of Aries. This area also experienced heightened seismic activity recently.

And unrelated to the geodetics of the situation but corresponding to the Aries New Moon, a fireball blazed in the sky throughout the midwest states of the US on Wednesday night as the fiery Aries New Moon squared off against Pluto.

Update: Jamie Funk kindly linked to this article and added an interesting fixed star connection:

"The fixed star Scheat is 29pis31. The day of the last New Moon, Saturn was exactly opposite at 29vir31. This is important because Scheat has long been associated with catastrophic events. The influence of Scheat is gaining strength as Uranus is applying within one degree of this star, soon to be followed in conjunction with Jupiter. Aviation has been effected before when planets conjunct Scheat.

ROGERS: "Odds & Thoughts" Con't

Scorpio - The heart of a cheating ex-lover.

Sagittarius - Assorted packets of airline nuts and cookies, caught on the red-eye from Vegas. (what a ride !!!!)

Capricorn - One onion. It's thrifty and who has time for a potluck ???

Aquarius - Bag of oranges bought from a migrant worker at a stoplight. (just helping our brothers in the struggle.)

Pisces - Holy water and assorted hallucinogens.

SYDNEY-April 2010 - Recipe calls for "Freshly Ground Black People"

An Australian publisher is reprinting 7,000 cookbooks over a recipe for pasta with "salt and freshly ground black people". Bob Sessions, Penguin Group Australia's head of publishing, acknowledged a proofreader should have caught the "silly mistake". We're mortified that this has become an issue of any kind and why anyone would be offended, we don't know", Sessions said. He said the publisher would replace the book for any buyer "small-minded enough" to complain. The reprinting will cost 20,000 Australian dollars (\$18,500 US)

Astro Forecast: " *Taurus* " written by Inge Lohse

April 20 to May 20

A fixed Earth sign of negative polarity ruled by Venus. Key Phrase: ' **I have** '

The Sun in Taurus strives for spiritual truth by working with the practical aspects of life. Taurus is represented by the bull, slow to anger, but once aroused - watch out! There is no way to stop a Taurus on a mission. Clear the path or you will get hurt. Taureans are fond of the good things of life, and focus their attention on acquiring material possessions. They love their creature comforts. The direct route to their hearts is right through their tummy. This sun sign needs security, both emotional and materialistic. Taureans have a lot of determination, which enables them to succeed by sheer willpower and tenacity. Some say they are stubborn, but actually, they are very patient and are willing to wait for the things they want. Artistic Taurus loves all things beautiful.

Forecast 2010 to 2011

Pluto entered the sign of Capricorn in November 2008. Pluto will trine your Taurus Sun for the next 16 years. You will have plenty of time to learn to use the exclusive power of Pluto. Slowly, but, surely you will notice subtle changes taking place - no longer will you be shy about expressing yourself. You will be a force to be reckoned with. You command attention and will likely be put in a position of authority as others recognize your potential to be a compelling and effective individual.

Nebulous Neptune, from the sign of Aquarius is causing some problems. It is difficult to see things as they really are. You can't quite put your finger on it, but you know something is not right. There is a lot of confusion and uncertainty in your corner of the world. You have a lot of unanswered questions. Look to your friends for ideas and inspiration. You really need to stay focused here.

Intuitive Uranus, the rebellious planet of unexpected surprises, started its transit through the sign of Pisces in March 2003 and will stay until 2011. This means you have a lot of opportunities coming your way. Uranus will present them to you in various ways, none of them will be logical and all of them will be a surprise. That is the way Uranus operates. Just pay attention - so you don't miss the one you want.

Constructive Saturn moves into the sign of Libra in July 2010. Saturn's job is to teach life's lessons in accordance to the sign it occupies and the aspects it makes. Saturn in Libra is a quincunx aspect to your Taurus sun. During the next two years you will prioritize what is really important to you. Venus rules both Taurus and Libra. It's all about what you hold most dear. You will re-evaluate your relationships. You will take stock of what you have - your assets. This is a time of adjustments, and you need to decide what and who is really significant in your life. Practical Saturn will help you balance your statement of essentials for the future.

Optimistic Jupiter entered the spiritual sign of Pisces in January 2010 and will stay for about a year. Jupiter in Pisces is divine inspiration and enhances your compassionate side. This aspect will bring many opportunities to expand for Taurus. Jupiter is about progress, and practical Taurus will ensure that common sense prevails. This year promises opportunities for travel and/or academic achievements.
